**NATO Phonetic Alphabet**

The phonetic language is used by professional communicators, especially police, military and other emergency and armed forces, to identify letters *precisely*, either when communicating initials, abbreviations or spellings of words. The phonetic alphabet is a useful reference for language and communications study and training. Different variations of the phonetic language exist - this one is the original and still most widely used.

A	alpha	X	x-ray
B	bravo	Y	yankee
